Physical Address:

City, State and Zip Code:

Email Address:

Office Phone Number:

Mentor Name/Email Address:

Please answer the following Accreditation Assessment Readiness questions:

1. The Accreditation Council invites formal application for initial approval of a curriculum any time after the first class of students majoring in environmental health science and protection has entered their final year of study. **Has your program graduated a class of students from the curriculum for which you are seeking accreditation? If yes, when did the first class graduate?**

If not, when is the anticipated date for graduating the first class?

2. What are the core Environmental Health related course that are available to students in your Graduate program?

3. Does your program ensure that students complete competencies in the following (place check beside all that apply)?

- Biological Sciences (Includes microbiology)
- Chemistry (General and Organic Chemistry)
- Geology
- Physics.

4. Does your program have a full-time faculty member with environmental health practitioner experience, who is responsible for administrating the environmental science and protection program?

5. Does your program have sufficient full-time equivalent, in conjunction with part-time or adjunct faculty, who are academically and professionally qualified, as required to meet the teaching, research and service obligation of the program? Please list their names and departments.
